

COMPANY PROFILE

Shree Constructions has been in business for over 14 years now and has achieved high levels of success in a relatively short span of time. The company commenced business due to the efforts put in by **Mr. Sanjeev Shreeram**. The promoter started the company because he felt that there was a paucity of Repairs and Rehabilitation Construction companies that offer customer's value in quality and duration of work.

Over the years, Shree Constructions has undertaken re construction and repairs work in most parts of the city and have always returned with satisfied customers. The major reason for satisfaction of customers is that we believe in complete transparency in all our dealings. We ensure that our customers are aware of all plans before the work commences and are involved in every bit of planning during the duration of work.

What makes Shree Constructions unique?

What we do! We are builders involved in new construction, additions, remodelling and historic renovations in both the residential and commercial sectors.

What we don't do: We do not build on speculation; our entire staffs are focused on working with customers to achieve their project goals.

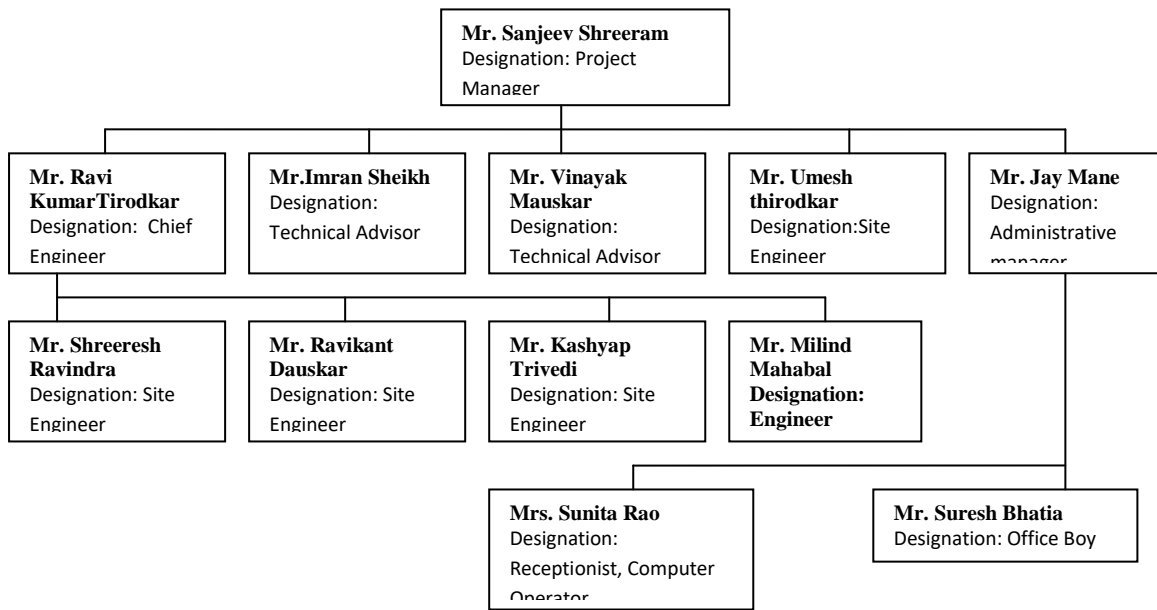

How we can help: We can provide layout and design suggestions for simple projects and we can work with any design professional of our customer's choosing.

How we handle each project: In addition to a project manager assigned to each project, we have an onsite supervisor. We also employ our own carpenters, making our crews more responsive to the needs of each customer.

In summary: We are a full service general contractor equipped to meet our customer's needs - - - what so ever they may be.

ORGANISATION CHART

COMPANY RESUME
